Dear Commissioner Henney:

Re: The banning of medically useful antibiotics from animal feed

I support the petition filed by the Center for Science in the Public Interest, and I urge you to ban the use of medically useful antibiotics in animal feed.

The addition of antibiotics, in order to promote growth, can make bacteria resistant to those antibiotics. As the bacteria mutate and become resistant, our physicians are further challenged to find means to treat life-threatening bacterial infections in humans.

yours very truly,

Joline N. Ozanne
